DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 14-27, and 30-33, drawn to a curable resin composition/sheet/electronic component joined body, comprising:

- An epoxy resin;
- A solid polymer having a functional group to react with an epoxy group; and
- A curing agent for an epoxy resin;
 - Wherein no phase separation is observed with a transmission electron microscope when a cured matrix of said composition is dyed with a heavy metal.

Group II, claim(s) 13, drawn to a curable resin composition, comprising:

- An epoxy resin having a dicyclo-pentadiene skeleton;
- An epoxy resin having a naphthalene skeleton;
- A curing agent for an epoxy resin;

- Core-shell rubber particles with a core having a glass transition temperature of 20°C or lower and a shell having a glass transition temperature of 40°C or higher.

Group III, claim(s) 28 and 29, drawn to a conductive connection pressure sensitive adhesive (PSA) sheet/tape, comprising:

- A plasticizer;
- An epoxy resin having a naphthalene skeleton (in liquid phase at normal temps);
- Conductive fine particles;
 - Wherein the PSA sheet/tape has a peak temperature $\tan\delta$ based on dynamic viscoelasticity in a range of -20°C to 40°C before curing and 120°C or higher after curing; and
 - Wherein the conductive fine particles are arranged at any positions of the PSA sheet/tape and at least part of the conductive fine particles being exposed out of the PSA sheet/tape.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each invention features a *materially different* composition.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
